Natural design for demanding spaces

Influenced by the enduring beauty and natural materials of dynamic surfaces, the texlyweave® design creates a sense of uniqueness in any space. Its slightly textured, two-tone yarn tissues are modern yet classic, and each unique design offers a performance that blends beautiful patterns to simulate a hand-worked material and unbeatable functionality into the facility's aesthetics. With passion and professionalism, we combine handcraft and modernity with simplicity and more stylish providing an inherent superior innovation rich in color and excellent texture.

Engineered surface for your elevator

The texlyweave® is an excellent accent for the highest style sound absorbing and anti-slipper projects. Its dense engineered vinyl texture surface backed in sturdy vinyl makes it highly resistant to wear and ready to withstand stain, mildew, water, and anti-bacterial.

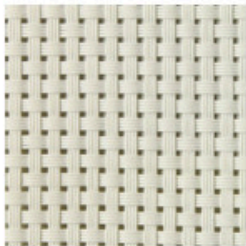

The texlyweave® promises excellent UV ray resistance, atmospheric agents, and rubbing resistance. They are easy to clean and sanitize. We work continuously for the best solutions regarding the sustainability of materials and processes, and we are aware of the value of the environment and the territory.

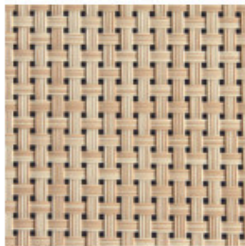

Grid weave design classic & modern

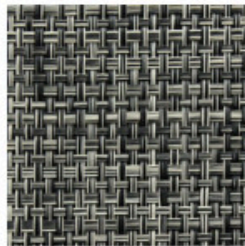

In any interior space, from modern to classical, the texlyweave® offers a mixture of decoration from wall to floor, two-tone yarns surface, and the acoustic PVC foam backing makes it more graphic and functional.

Ele-Floor for custom shape

The elevator floors will see far more foot traffic than almost any other space in the building. Therefore, elevator flooring must be durable, easy to clean, easy to replace, and still fit the facility's aesthetics. In the past, due to its durability, elevator floor covering had been primarily made from metal. But the demand for comfort and aesthetic appeal has made metal elevator flooring a thing of the past. The texlyweave® presents a new engineered surface with vinyl-coated yarn that significantly increases wear resistance and two-tone aesthetics that enhance the tactile experience of the textures. The technology allows characters to be used, cleaned and enjoyed longer.

texlyweave® is initially supplied for the elevator factories and delivered to lift renovators.

Attached is an application to a pneumatic vacuum lift and renovation elevator deck.

The woven vinyl floor displayed here is sprinkled with silver weft yarn and translucent shiny slub, providing the stately fabric contemporary rhythm with a handcrafted aesthetic.

High durable quality yarn, a smooth handle, and finished with specialized treatment ensures the floor meets heavy traffic's needs.
