ABOUT US

texlyweave® & texlymat® are new type of floor covering products started 20 years ago. The inspiration to apply the woven vinyl fabric for outdoor furniture at first and The Dragonshine turned it to flooring surface. The woven vinyl, a kind of synthetic material woven by improved textile machinery and finishing techniques, boasts its superior functional performances to traditional coated natural canvas, colorful, and durable. It is uniquely textured, but offers a feel and look like a natural plant fiber. It can be extendedly used as wall to wall floor covering, floor mats, wall covering, wall panel, and several of upholstery. Many designers use this style of new material to express their reputation for being quite quirky and original. The creativity and avant-garde fashion project give impetus to the product itself in flooring and wall territory.
