

MAINTENANCE FOR MAT & RUG

texlyweave® fabric presents a new engineered surface with vinyl-coated yarn that significantly increases wear resistance and two-tone aesthetics that enhance the tactile experience of the textures.

Over-engineered for incredible durability, use texlyweave to meet the needs of today's modern living. Long-lasting colors, unique feel, and modern look! Easy to apply, clean, and maintain; strong, durable, soft, and comfortable.

"The technology allows surfaces to be used, cleaned, and enjoyed longer."

A brilliant choice for offices, gyms & hotels, the texlyweave wall-to-floor range is also a popular option at home anywhere from ensuites and bathrooms to kitchens and studios where a statement finish is desired.

The maintenance instruction below will help you create a beautiful and durable floor.

1. Maintenance Instructions General:

1.1. texlyweave® flooring is very tough and durable. It comprises an outer layer of texlyweave® woven Vinyl laminated onto a polyvinyl chloride backing. Woven Vinyl is a fabric made from polyvinyl chloride-coated polyester yarn. It can be easily cleaned with a household detergent and even water. Soil and stains on texlyweave® are removed quickly and efficiently to keep a good aesthetic and preserve the original style.

1.2. Proper routine maintenance, periodic cleanings, and diligent attention to stain-causing spills will increase life circle and perfect hygiene. The level of use of the floor and the dirt load should determine the frequency. The methods for routine maintenance and cleaning methods also depend on the application. Frequency depends on the amount of soil and dirt texlyweave® is exposed.

1.3. texlyweave® flooring surface does not absorb water, and the back cushion is semi-absorbent. An ample amount of water can be used effectively in daily maintenance. When using water with any of the maintenance techniques, the dirty water should be vacuumed, and the subfloor or the raised floor tiles must be waterproof as water can seep through the seams, be sure not to leave any standing water and keep foot traffic off the floor until it is scorched.

1.4. Washing or mopping of texlyweave® flooring only possibly leaves dirty water in the

structure, and dries up, causing smudges and aureoles.

1.5. Household detergents with a pH of up to 11 are safe for texlyweave® flooring. Do not use solvents such as Acetone, Pine-Sol, or Citrus based cleaners, as they can damage texlyweave®.

1.6. It is recommended to provide a strategic walk-off mat system to maintain the property's value. Additionally, it is imperative to invest in a sound dirt collection system, which can collect up to 80% of the tracking of soil and other foot-borne contaminants onto the texlyweave® floor.

1.7. Sealers, waxes, stain repellents, and other topical applications are unnecessary for texlyweave®.

1.8. Direct contact between natural rubber and texlyweave® will cause color migration in texlyweave®. Adequate protection is necessary.

1.9. Applying chair pads under rolling chairs to protect texlyweave® fabric and seams. Indentations could be worn off days after release.

1.10. Sometimes, small white fiber protrusions may / appear along cut edges of texlyweave®. This is normal, and maintenance should include trimming these fibers.

2. Maintenance Techniques

2.1. Sharp objects can damage texlyweave® irreparably. Avoid this appropriate using protection on the floor, and be sure not to use them to remove stains.

2.2. Always protect the floor when moving furniture. For example, lift the furniture or use pads.

2.3. It is essential to remove the construction dust carefully before taking the floor into service, especially if there is inadequate protection. This dust is very abrasive and can cause long-term walking lanes due to a loss of gloss.

2.4. The most common and easily accessible maintenance option is the vacuum cleaner. Either is effective in picking up and removing dirt asap. Vacuuming the surface of the texlyweave® to release dirt and brush out scuffs.

2.5. Towel wiping using detergent is also effective. However, be sure to add clean water rinse after applying detergent residue, which would attract soil if not properly cleaned.

2.6. Vacuuming only needs to be increased over a more extended period. Deep cleaning with a professional injection extraction machine must be performed at certain intervals, depending on the level of soiling. Care should be taken to avoid abrade texlyweave with the rotating. Hard-to-remove stains should be treated by hand, not machine, as per the instructions below. Follow the manufacturer's recommendations to get the best results from the equipment. Do not exceed 11 pH for chemicals used in the machinery. As noted above, you should be taken care to remove all detergent residue, or it may attract more dirt.

2.7. For commercial and institutional installations, a recommended cleaning program would consist of daily vacuuming to remove stains, daily spot cleaning, and periodic comprehensive cleaning. The frequency of the thorough cleaning depends upon the use and should be determined in consultation with local maintenance professionals.

3. Spot And Stain Removal

Even with routine maintenance, stains and spots will occur. Clean up spills as quickly as possible. Watery spills should be blotted with clean cloths or paper towels. Thick jelly-like substances should be removed with a spoon or blunt scraper and then stained. Solid should be scraped using a sharp scraper and then swept, brushed, or vacuumed to remove the material. After removing most of the spilled material, it is essential to complete the removal process, so the spill does not have a chance to affect the flooring.

Texlyweave is stain-resistant, not stain-proof. Blot and clean immediately to avoid lasting stains

Follow all cleaning procedures using common detergents with a water-only rinse to remove all residual cleaning agents (If Crystal Dry is used, a follow-up water rinse is not required). Allow the area to dry completely before allowing traffic in the area.

NOTE: Stains that cannot be removed under the listed procedures can be treated with a 1:10 bleach-to-water solution. Mist the solution on the area of discoloration and allow it to dwell for 5 minutes. Then, rinse the area with water only to remove the bleach residue. Allow drying entirely before trafficking. Some stains may require a professional to complete the stain removal process.

The Warranty For Complete Or Partly Compensation Of Complaints by Dragonshine Will Be Void If the Above Maintenance Instructions Are Not Strictly Respected.

CLEANING & CARE GUIDENLINES

	Type of Stain 污渍种类	Procedure and Removal 清洗方法
1	Acid 酸性物质	Neutralize with ammonia 用氨水中和
2	Adhesive tape 粘胶带	Harden with ice, rub off with fingers 先用冰块使其变硬，再用手指擦掉
3	Alcoholic Beverages 酒精饮料	Rinse with cold water, immediately followed by white vinegar, then rinse with cold water 先用冷水擦洗，随后立即用白醋擦洗，最后再用冷水清洗
4	Alkali 碱性物质	Neutralize with vinegar 用醋中和
5	Blood, catsup 血迹, 番茄酱	Rinse in cold water, then dilute ammonia, sponge with detergent and water, then rinse thoroughly 先用冷水擦洗，再将稀释过的氨水清洗，最后彻底清洗一遍
6	Butter 奶油, 黄油类	Rinse with hot water 用热水擦洗
7	Chewing Gum 口香糖	Apply ice, rinse with cold water, then sponge with 先用冰块使其变硬，再用冷水擦洗，最后用全氯乙烯（一种除斑剂）蘸海绵清洗
8	Chocolate 巧克力	Rinse with cold water, sponge with bleach 用冷水清洗，再用漂白剂溶合水蘸海绵擦洗
9	Coffee 咖啡	Rinse with cold water, sponge with detergent and water 用冷水清洗，再用清洁剂溶合水蘸海绵擦洗
10	Egg 蛋清, 蛋黄类	Rinse with cold water, sponge with detergent and water 用冷水清洗，再用清洁剂溶合水蘸海绵擦洗
11	Fruit, berry 水果, 浆果	If fresh, pour boiling water through the stain; if stubborn, bleach with hypochlorite or hydrogen peroxide. 如果是新鲜水果类，用沸腾的水倒入污迹处溶解，如果是干果类，用次氯酸盐或过氧化氢等漂白剂漂白污迹
12	Grass 青草迹	Sponge with alcohol, then detergent and water 海绵蘸酒精擦洗，再用清洁剂溶合水清洗
13	Ice Cream 冰淇淋	Sponge with Perchloroethylene (spot remover) 用全氯乙烯（一种除斑剂）蘸海绵清洗
14	Iodine 碘酒	Sponge with alcohol 海绵蘸酒精擦洗
15	Ink (Pen) 钢笔墨水迹	If fresh, sponge with detergent and water. If dried, sponge with bleach and oxalic acid (spot remover), and then scrub with detergent and water. 如果是刚刚滴落的，用清洁剂溶合水蘸海绵擦洗。如果是干的，先用海绵蘸漂白水擦洗，再用草酸（一种去污剂）擦洗，最后再用清洁剂溶合水擦洗
16	Ink (Ballpoint) 圆珠笔墨迹	Scrub with detergent and water, then rinse. For stubborn stains, use petroleum jelly, then sponge with Perchloroethylene (spot remover). Some inks dissolve in glycerin, followed by shampoo. 用清洁剂溶合水清洗，如果是干的，先用凡士林油，再用全氯乙烯（一种去污剂）蘸海绵清洗，有些墨迹可以在带有甘油的洗发剂中溶解

	Type of Stain 污渍种类	Procedure and Removal 清洗方法
17	Iron Rust 铁锈迹	Sponge with oxalic acid (spot remover), rinse well or spread with salt, moisten with lemon juice, then place in the sun. 用草酸剂（一种除斑剂）蘸海绵清洗能够很好地清洗掉，或者也可以在污迹上抹上一层盐，再用柠檬汁将其弄湿，然后放在阳光下晾干
18	Lipstick, wax, 口红印, 蜡	Sponge with alcohol or Perchloroethylene (spot remover) 用酒精或全氯乙烯（一种除斑剂）蘸海绵擦洗
19	Mildew 霉斑	Sponge with bleach, followed by a water rinse 先用漂白剂蘸海绵清洗，再用清水擦洗
20	Milk or Cream 牛奶或奶油迹	Sponge with Perchloroethylene (spot remover) 用全氯乙烯（一种除斑剂）蘸海绵擦洗
21	Mustard 芥末, 芥菜迹	Apply warm glycerin, wash with sudsy water and Hydrosulfite bleach 先用热甘油擦拭，再用肥皂水和漂白剂轻擦洗
22	Oil 油迹	Scrub with detergent and water, and sponge with Perchloroethylene (spot remover) 用清洁剂溶合水清洗，再用全氯乙烯（一种去污剂）擦洗
23	Paint 油漆污迹	Scrub with detergent and water, then sponge with Perchloroethylene (spot remover) or turpentine. If not dried, latex and acrylic paints will wash away. 用清洁剂溶合水清洗，再用全氯乙烯（一种去污剂）擦洗，或者用松节油擦拭。如果不是干的，乳胶和丙烯原料可以被冲洗干净
24	Perspiration 汗渍	Sponge with peroxide and ammonia, and rinse with water. 用过氧化氢和氨水蘸海绵擦洗，再用清水冲洗
25	Sugar 糖渍	Sponge with hot water 用热水蘸海绵清洗
26	Tar 焦油污迹	Moisten with Perchloroethylene (spot remover), scrape off, then sponge residue with the same solvent 用全氯乙烯（一种去污剂）将污迹处弄湿，然后擦拭，最后用同样的溶剂再蘸海绵擦洗。
27	Tea 茶渍	Scrub with a borax solution and rinse, or keep the stain moist With lemon juice, then expose to the sun for a day or two 用硼砂擦拭，或者用柠檬汁让污迹保持潮湿，然后放在阳光下晒一到两天晾干。
28	Asphalt 沥青	A neutral cleaning agent or cleaner's naphtha, a scouring pad may be used 中性清洁剂或者是清洁挥发性溶剂汽油
29	Floor adhesive 地板胶水	Adhesive wash or methylated spirit, a scouring pad may be used; Dry carefully with a cotton cloth. 用甲基化酒精，用专业擦洗垫，用棉质布料擦干
30	Shoe heel marks 鞋跟印	A neutral cleaning agent or cleaner's naphtha, a scouring pad may be used 中性清洁剂或者是清洁挥发性溶剂汽油
31	Vomit, Excrement, Urine 呕吐物,排泄物	A neutral cleaning agent or cleaner's naphtha, a scouring pad may be used 中性清洁剂或者是清洁挥发性溶剂汽油
