We challenge the norms of weaving!

texlyweave presents its joyful new collections, based on the awareness of every single gesture we make which, in the world of color and texture, means research to conceived of exciting new update originality, whose surface dynamically, and healthy products with high performances.

texlyweave wants to create a new engineered surface with vinyl coated yarn that significantly increase wear resistance and two-tone aesthetics that enhance the tactile experience of the textures.

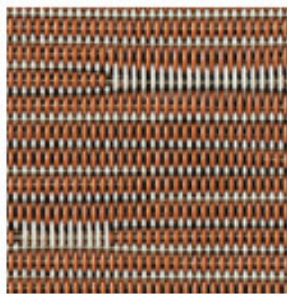

The technology allows surfaces to be used, cleaned and enjoyed longer. Nature infuses us with an intimate sense of peace to remind us of the little pleasures of childhood: from the games that used to fill our days to the ecstatic gaze in front of the season's colors. This time, the scrubby resin is shimmering.

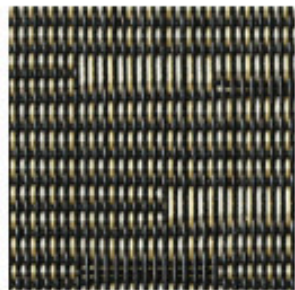

Gentle value changes of the base color create a subtle, linear pattern. The surface both accentuates and visually supports the directional design.
